

Course Title:	<h1>Diploma in Geoinformatics</h1>
Description:	<p>Diploma in Geoinformatics is uniquely designed, consist of 14 modules with project. Covers all required skills for industry for various sectors. Emphasis more on industry required skills hence strengthen job assurance.</p> <p>Remote Sensing and Geographic Information System (GIS) were initially recognized as supporting tools for planning, monitoring, and management of appropriate utilization of the earth resources. However, due to their multidisciplinary applications and integration with other numerous scientific and technological fields, in the recent years they became a distinct field of study.</p>
Learning Objective:	<ul style="list-style-type: none"> • Module 1: Geographic Information System • Module 2: Working with AutoCAD Map 3D • Module 3: Working with QGIS • Module 4: Advance Spatial Analysis • Module 5: Working with ArcGIS Desktop • Module 6: Working with Microstation • Module 7: Introduction to Surveying Technologies (GPS, Total Station, LiDAR) • Module 8: Data Collection with GPS • Module 9: Working with LiDAR Data • Module 10: Working with ERDAS Imagine • Module 11: Building Models for GIS Analysis Using ArcGIS • Module 12: Geospatial programming with Python • Module 13: Technical Communication and Aptitude • Project work
Fees Structure:	<p>50,000 INR, for resident Nationals of India, Nepal, Bhutan, Bangladesh, Sri Lanka and Maldives, & Myanmar.</p> <p>1300 USD, For Non-Residents of India</p>
Course Duration:	6 months full time (5 days a week)
Prerequisites	<ul style="list-style-type: none"> ✚ Basic knowledge of computers ✚ Should score more than 60% in entrance exam
Who Should Attends:	✚ Any graduate score higher than 50%
Training Mode:	<p>Online - Instructor Lead</p> <p>Classroom - Instructor Lead</p>
Batch Capacity:	10 Students
How to Apply:	Click here to know bank details and step by step registration process.
